Cell is not life nor is life cell

Mahapatra APK, Mohapatra S, Dalai, ND, Mishra, SR, Kundu AK

Abstract

From ancient time till time almost everyone over the World that 'Cell can be defined as the smallest, structural and functional unit of the Life or living organism' and which can be considered as the cell theory. Which is not accepted by the authors? Therefore, some logical, philosophical, scientific, spiritual, points are focused here to define cell which would change the concept of the life and cell.

Keywords: Cell, Life Concept.

Introduction

This content is aimed at proving that cell is not the unit of life. Hence all the students at the Veterinary College were also asked to answer convincingly the same thing when asked. (n=>500). Cells are found in dead fossils or bodies. Therefore, we call it as a dead cell. Why we are adding an adjective to the cell such as alive or dead. Had the life being the unit of life^{1,2} (then the cell would have that life) which means paradoxical theory.

1. Methodology

Deep Thinking, logical discussing, Feelings, experience, realization logically from many angles of life etc...

2. Procedure

We used to discuss every day from 5pm to 7pm with dedication and commitment to follow the above-mentioned methods. Asking and discussing to all types of human beings including 500 students and faculties too of this college.

3. Result

Everyone agreed convincingly that life is something which is more than science, arts, commerce, mathematics, chemistry, Physics, biology which is in contradiction to the prevalent theory regarding cell.

4. Discussion

Why a living person who does not know the swimming died by drowning and the same body floats when the same living object is not having life or becomes dead, but the dry weight, mass, volume are same in both the livings and non-livings.

5. Conclusion

From the above vivid discussion, we can conclude that life is not cell nor the cell is life, rather we can change our perspectives towards the most fundamental science, in spite we can suggest that "cell may be the unit of matter"
